INDEX TO ILLUSTRATIONS

American Association of variable star observers, Photograph of the, at the Harvard College Observatory, November 18, 1916, Plate III ..... Op. 69
Astronomical Society, Photograph of the, at Albany, N. Y., August 29-31, 1917, (with key), Plate XVIII ..... Op. 518
Aurora Spectrum photographed at the Lowell Observatory, Plate XI ..... Op. 274
Cluster M 13 in Hercules, The star, Plate IV ..... Op. 75
Color scale, by *William H. Pickering* ..... Op. 419
Comet *b* 1916 (Wolf), apparent path of, during April and May, 1917 262
from February 26 to December 16, 1917 264
in August and September, 1917 476
diagram of the orbit of 210
a 1917 (Mellish), diagram of the orbit of 332
b 1917 (Schaumasse), diagram of the orbit of 407
Constellation Charts 54, 128, 196, 256, 319, 393, 458, 533, 607, 669
Constellations near the pole 587
Copernicus, Kepler and Aristarchus, Plate VII ..... Op. 172
δ *Cephei*, Oscillations of light and corresponding variations of spectrum of ... 590
Eclipse of the moon, Total, January 7-8, 1917 17
December 28, 1917 572
sun, Total, June 8, 1918, as visible in the United States 574, 575, 576, 577
drawing of path of by *Edison Pettit*, Plate II ..... Op. 16
solar, August 30, 1905 (diagram) 479
The south polar, of December 13, 1917, as seen at the south pole 358
Beginning of 350
Central line near the pole for every minute of 354
second of 355
End of 352
General view of 347
Middle of 351
Reference points on sun's disk 348
Summary 353
Vertical section through the axes of earth and shadow. 356
η *Aquilae*, Light curve of, and variations of its spectrum 592
Jupiter, drawn by *Latimer J. Wilson*, Plate I ..... Op. 1
drawing of South Tropical Dark Area and Red Spot Hollow 2
orbits of satellites of, in 1917 49
the planet 579
Jupiter's eighth and ninth satellites, Orbits of 339

Lunar crater, Theophilus and surroundings, The, Plate V....Op. 149
Plate VI ....Op. 168
Mars, The planet, colored drawing by *Alfred Rordame,* Plate XIV....Op. 343
Moon, Total eclipse of the, January 7-8, 1917.... 17
December 28, 1917.... 572
Mount Wilson Solar Observatory, The dome for the 100-inch reflector, Plate XXV ....Op. 651
100-inch disc for the great reflector of, on the grinding table, Plate XXI ....Op. 635
machinery used in the rough grinding of the 100-inch disc, Plate XXIII ....Op. 649
tool used for applying the emery flour in polishing the great mirror, Plate XXIV ....Op. 650
working model of the mounting of the 100-inch reflector, Plate XXV.... ....Op. 651
Nebula, The great spiral, Messier 51, in the constellation *Canes Venatici,* Plate XXII ....Op. 638
Neptune, Orbit of satellite of, in 1917.... 50
Observatory, Mr. J. H. Darling's, at Duluth, Minnesota, Plate XX....Op. 557
of Silla, The, Plate XVII....Op. 490
The Litchfield, of Hamilton College.... 414
Dudley, Albany, N. Y., Plate XIX....Op. 526
Percival Lowell, Plate IX....Op. 219
Photograph of lead target riddled with bullets, Plate VI....Op. 168
Planets, Apparent paths of the, among the stars in 1917....47, 48
Profile section through an ideal volcanic vent.... 170
Proper motion in the system Σ 142.... 302
Reflector and spectrograph, The thirty-seven inch, of the Detroit Observatory, Plate XII....Op. 276
Rheita Valley, The, Plate VII....Op. 172
RR *Lyrae,* Variations in the form of maxima of.... 593
Saturn, Orbits of satellites of, in 1917.... 49
Solar Halo, A, (drawing).... 552
Solar eclipse, Partial, of June 19, 1917, Chart of.... 295
Spectra, Stellar, illustrating steps in the transition from the sun to the standard Class N, Plate XIII....Op. 279
Spectrum, Portion of solar, photographed by *Edwin B. Frost* at solar eclipse in 1900, Plate VIII....Op. 180
Sun, diagram of path of total eclipse of the, June 8, 1918, by *Edison Pettit* Op. 16
Sun's motion in space.... 156
Sunspot of February 9, 1917, photographed by *Mary R. Calvert,* Plate X, Op. 258
Star-density according to Seeliger.... 107
graph of, in zones of galactic latitude.... 106
increase of, in hours of right ascension.... 105
Telescope adapted to a closed observing room, *Russell W. Porter,* (diagrams) 297, 299
Theophilus and surroundings, The lunar crater, Plate V....Op. 149

Theophilus, Areas of snow and cloud in..... 150
drawing of 155
To a Comet, Plate XVI.....Op. 487
Tycho, region west of, Plate VI.....Op. 168
Uranus, Light curve of..... 257
orbits of satellites of, in 1917..... 50
υ_4 *Eridani*, Velocity curves of..... 294
Valley of the Alps, Plate VII.....Op. 172
Variable stars, Light curves of, *C. B. Lindsley*.....58, 59
Wargentin plateau, Plate VII.....Op. 172

GENERAL INDEX TO VOLUME XXV

Abbot, C. G., Examination of new evidence on the solar constant..... 177
Adolfo Stahl lectures, The..... 74
Albedos, Lunar and terrestrial, *Frank W. Very*..... 110
of the planets, The spherical, *Frank W. Very*..... 112
Albrecht, Sebastian, On the variation in spectral type of the fourth class variable star *l Carinae* (abstract)..... 519
Aldrich, L. B., Examination of new evidence on the solar constant..... 177
Allen, Wm. M., The number of planets known to the ancients..... 628
Altair, The parallaxes of Procyon and, *S. A. Mitchell*..... 38
Amateurs, A class for, *Mary E. Byrd*..... 211
American Astronomical Society..... 412
Report of the ninteenth meeting of the....23, 107
twentieth meeting of the.....
.....223, 307, 372
twenty-first meeting of the....
.....516, 594, 652
Andromeda, Measurements of the position of the nucleus of the great nebula in, *C. O. Lampland*..... 658
Asteroid (129) Antigone, Variation of the..... 415
(349) Dembowska, Ephemeris of, *Frank E. Seagrave*..... 552
(15) Eunomia for the opposition of February 7, 1918, Ephemeris of, *Frank E. Seagrave*..... 615
(471) Papagena, The..... 616
Asteroids, Variability of, *Edward C. Pickering*..... 664
As through a window opened wide, *Charles Nevers Holmes*..... 437
Astronomer, The, *George B. Staff*..... 345
Astronomers, A few pre-Copernican, *Edith R. Wilson*..... 88
Awards to, by the French Academy of Sciences..... 215
in time of war, The best service of, *George E. Hale*..... 652
Astronomical day, The beginning of the, *W. S. Eichelberger*..... 690
discoveries, Two important..... 632
phenomena in 1917..... 45
Astronomy and the end of the war (Translation)..... 277
by one's self, Studying..... 142
in Canada 212
The greatest need of..... 276
The war and 554
Atmospheric thermodynamics, The radiant properties of the earth from the standpoint of 115
August skies, In, *Charles Nevers Holmes*..... 427
Aurora borealis in 1916, The, *J. J. Schafer*..... 271
Spectral evidence of a persistent, *V. M. Slipher*..... 37
Auroral (?) luminosity, *W. E. Glanville*..... 337
phenomenon, A peculiar, *J. W. Millikan*..... 553
Axes of the planets are inclined, Why the, *William H. Pickering*..... 487
Badgley, W. F., Enlargement of the sun at sunset..... 436

Bailey, S. I., Note on the form of the light curve of variable stars of cluster type (abstract) ... 307
variable stars in the globular cluster Messier 15 (abstract) ... 520
Baker, Harold R., Stations for the solar eclipse of June 8, 1918 ... 529
Barns, C. E., In limine (Poem) ... 512
Paradoxical (Poem) ... 634
The demon-star (Poem) ... 558
Vega (Poem) ... 532
Bauer, L. A., A brief statement of the work of the committee on navigation and nautical instruments of the national research council (abstract) ... 520
Some results of the ocean scientific work of the department of terrestrial magnetism, 1905-1916 (abstract) ... 308
Beard, Donald Putnam, The impact origin of the moon's craters ... 167
Beers, Frances Isabel, With the rolling years (Poem) ... 278
Bigelow, F. H., The temperatures on the sun ... 339
Binary stars, On the determination of the orbits of visual, *Henry Norris Russell* ... 667
Orbits of visual, *Henry Norris Russell* ... 667
The parallax of certain, *Hannah B. Steele* ... 107
Birth of a planet, The, *N. Johannsen* ... 428, 496
Book Reviews:
Moulton's Introduction to astronomy ... 217
The great comet of 1680; a study in the history of rationalism by J. H. Robinson ... 342
Borton, Martha C., Results of the photographic observations of eclipsing variables (abstract) ... 30
Boss, Benjamin, Hypothetical parallaxes of stars of large proper motion (abstract) ... 311
Peculiar relative motion between stars of different type near the south galactic pole (abstract) ... 308
Tendencies toward systematic drift of stars in bright belt (abstract) ... 309
The distribution of the bright stars (abstract) ... 310
Bright stars, The distribution of the, *Benjamin Boss* ... 310
Brightness of an infinite universe, The, *J. L. Coolidge* ... 454
Brown, Theodore H., Clearness of the night sky determined from a ten year record of the pole star (abstract) ... 312
Bruce medal not awarded for 1917, The ... 634
The ... 73
Byrd, Mary E., A class for amateurs ... 211
Campbell, Frederic, Leap years with 53 Sundays ... 72
Learning the first magnitude stars ... 245
Campbell, Leon, Note on the peculiar variable star SS *Cygni* (abstract) ... 312
Campbell, W. W., Spectrographic observations of rotation in planetary nebulae N. G. C. 7026 and N. G. C. 7662 (abstract) ... 313
Candor, R. R., A mechanical device for interpolation (abstract) ... 521
Cannon, Annie J., Distribution of light in stellar spectra (abstract) ... 521
The spectra of U *Cephei* (abstract) ... 314
Cannon, J. B., Note on two spectroscopic binaries (abstract) ... 521

Capture of comets by planets, On the, *Henry Norris Russell*..... 29
Cepheids, stars of variable spectra, The, *G. Renaudot*..... 587
variables, Notes on the spectra of, *Harlow Shapley*..... 36
Class R spectra in the Harvard sequence, The place of the, *R. H. Curtiss*.... 279
Clearness of the night sky determined from a ten year record of the pole star, *Theodore H. Brown*..... 312
Clock rates, Notes on a possible explanation of erratic jumps in, *Wm. A. Conrad* 522
Colors of the stars and planets, The, Part I, *William H. Pickering*..... 419
Comet 1909 IV (Daniel), Search ephemeris for, *F. E. Seagrave*..... 261
b 1916 (Wolf).....60, 210, 550, 614
Apparent path of and ephemeris of..... 477
Diagram of orbit of..... 210
path of, and ephemeris of.....262, 264
Ephemeris of.....60, 218, 263, 408, 550, 551, 615
Near approach of, to the asteroid Vesta on November 4, 1917 334
a 1917 (Mellish), Elements and ephemeris.....331, 477
New 264
b 1917 (Schaumasse), Elements..... 475
and ephemeris 407
Ephemeris of, *Frank E. Seagrave*..... 689
New 335
c 1917 (Wolf), New.....550, 614
committee, Final report of the, *George C. Comstock*..... 118
D'Arrest's, Ephemeris of..... 409
periodic, Elements and ephemeris..... 333
Encke's 550
Ephemeris of, *Frank E. Seagrave*..... 688
Search ephemeris for, for December, 1917..... 615
Metcalf's 59
Committee of one hundred, The..... 144
on asteroids, Report of the, *A. O. Leuschner*..... 385
Comparison of Washington declinations with those of Newcomb, Auwers and Boss, *W. S. Eichelberger* and *H. R. Morgan* 604
right ascensions with those of Newcomb, Auwers, Boss, Hedrick and Pulkowa 1905, *W. S. Eichelberger* and *H. R. Morgan*..... 600
stars for stellar parallax determination, Note on selection of, *J. H. Pitman*..... 126
Selection of, *J. H. Pitman* 28
Comstock, George C., Final report of the comet committee..... 118
Conrad, Wm. A., Note on a possible explanation of erratic jumps in clock rates (abstract) 522
